Mckinney Trailer Rentals Moves to In-Yard Real Time Digital Inspections

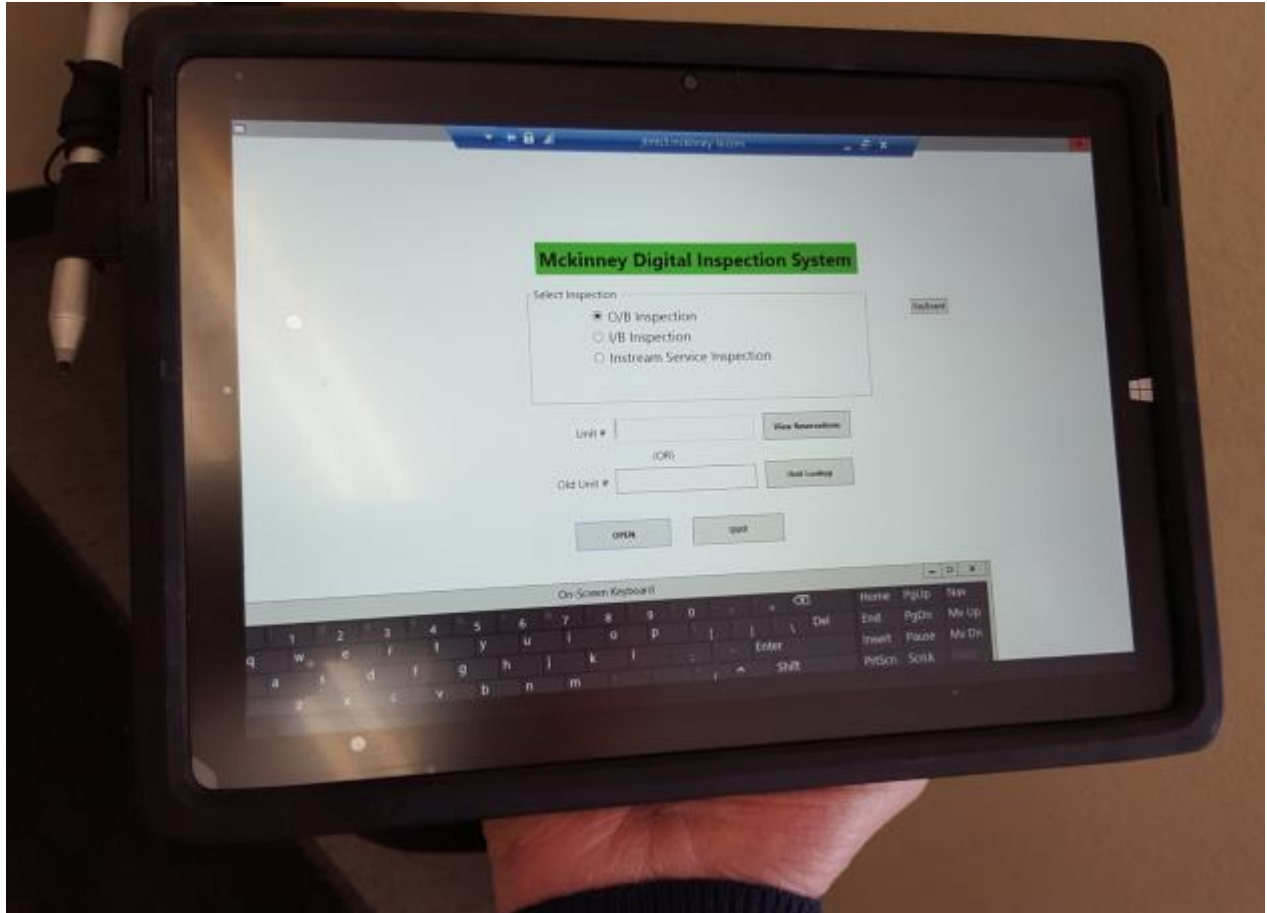

For Immediate Release

Pico Rivera, CA (2017) Mckinney Trailer Rentals, a leading provider of trailer equipment rentals and leases, has launched a new digital inspection system. This new process is used for more efficient outbound and inbound inspections.

Using Microsoft Surface Tablets with 4Lte connectivity, all information is captured at the time of the inspection. This provides the customer an emailed copy of the inspection with their notification of an outbound or inbound transaction.

“This allows our customers to be instantly aware of all rental activities, as well as letting them know right away if a trailer is returned with damages that will need to be charged”, said TK Gardner, CIO of Mckinney Trailer Rentals. “All information, including tire and brake information, is tracked digitally in Mckinney’s proprietary management software.”

This new process allows Mckinney to increase value to its’ customers. Mckinney’s commitment to valet-style service on checkout will mean a better, faster experience for customers and their drivers; providing even more accurate tracking of all trailer, driver, customer and contract information.

About Mckinney Trailer Rentals:
